**DETAILED ACTION**

***Election/Restriction***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-8, drawn to a pattern inspection, classified in class 382, subclass 144.
  - II. Claims 9-15, drawn to pattern inspection an emitting unit configure to emit light to a sample based on a light beam and electron beam, classified in class 250, subclass 310.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as a pattern inspection, invention II has separate utility such as emitting unit configure to emit light on a sample based on a light beam and electron beam, a signal output unit configure to output a signal to output a relative signal according to a relative movement between the sample and the detecting unit. See MPEP. 806.05(d).

2. Because these inventions are distinct for the reason given above and have acquired a separate status in the art as shown by their different classification and divergent subject matter, restriction for examination purposes as indicated is proper.
3. A telephone call was made to Mr. Eckhard Kuesters on Dec 22, 2006 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 2624

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventor ship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventor ship must be accompanied by a diligently-filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).
